

Multiple DMR BrandMeister ID Numbers

One ID Number is Ideal for most.
You only need to [register](#) a Max of 2 ID Numbers.

When using Multiple DV Devices. (OpenSpot or DVMega)

You will have your 7 Dig ID that will be used in all your DMR radios

In the DV devices if running more than one you can now do this.

1st Device your 7 dig ID.

2nd Device your 7 dig ID but add 0 to 9 on the end to make a 8 Dig ID

3rd Each Device take the last number up by 1

Maximum ID length can be 9 digits long (This will give you 100 IDs)

Make sure each DV Device is on, its own Frequency.

When setting up Multiple Repeaters

You will have your 6 Dig ID for your first repeater.

Running more than one repeater you can now do this.

1st Repeater your 6 dig ID.

2nd Repeater 6 dig ID but add 0 to 9 on the end to make a 7 Dig ID

3rd Each Repeater take the last number up by 1

Maximum ID length can be 8 digits long (This will give you 100 IDs)
